THE AUSTRALIAN JOURNAL OF EXPERIMENTAL BIOLOGY AND MEDICAL SCIENCE

VOLUME XXXIII

AUTHOR INDEX

Atkinson, N. Antibacterial activity in members of the higher fungi.
2. Psalliotin, the antibiotic of *Psalliota xanthoderma*, 237.
3. Antibacterial and antiphage tests with psalliotin, 381.

Atkinson, N., and Brice, H. E. Antibacterial substances produced by flowering plants.
2. The antibacterial action of essential oils from some Australian plants, 547.

Atkinson, N. Lysogenicity and lysis patterns in the Salmonellas.
3. A bacteriophage grouping scheme for S. *adelaide*, 371.
4. Application of a bacteriophage grouping scheme to 413 strains of S. *adelaide* (Atkinson and Klauss), 375.
5. Further tests with S. *bovis-morbificans* (Atkinson and Klauss), 421.

Beech, M., *see* Mykytowycz, R.

Bentley, G. A., *see* Shaw, F. H.; De la Lande, I. S.

Bloomfield, B., *see* Lemberg, R.

Brice, H. E., *see* Atkinson, N.

Burnet, F. M., Lind, P. E., and Stevens, K. M. Production of incomplete influenza virus in the deembryonated egg, 127.

Burnet, F. M., and Lind, P. E. Recombination between the influenza virus strains WSE and CAM, 281.

Byrom, F. B., and Cameron, D. A. Cranial windows in the rat, 225.

Caiger, P., *see* Lemberg, R.

Cameron, D. A., *see* Byrom, F. B.

Cobbin, L. B., Lawson, P. T., and McFadyen, R. An apparatus for the study of the effects of central nervous stimulants on the spontaneous activity of small laboratory animals, 535.

Constance, T. J. An experimental study of the reaction of skeletal muscle to injury, 257.

Crosby, N. D., *see* Waring, H.

Curnow, D. H., and Rossiter, R. C. The occurrence of genistein in subterranean clover (*T. subterraneum*, L.) and other trifolium species, 243.

Curtain, C. C., and Pye, J. A mucoprotein from bovine submaxillary glands with restricted inhibitory action against influenza virus haemagglutination, 315.

Dane, D. Surrey, *see* Mykytowycz, R.

Darian Smith, I., *see* Smith, I. D.

Dawbarn, M. C., and Hine, D. C. The determination of vitamin B_{12}-activity in the organs and excreta of sheep.
3. The excretion of vitamin B_{12}-active factors in the faeces and urine of sheep, 335.

Dawbarn, M. C., *see also* Hine, D. C.

De la Lande, I. S., and Bentley, G. A. The action of morphine and antagonists of the narcotic action of morphine on acetyl choline synthesis in brain, 555.

Dineen, J. K., and Robertson, J. S. The pancreatic lesion in adult mice infected with a strain of pleurodynia virus.
3. The response of the pancreas to the simultaneous production of amylase and virus, 567.

Eden, E., and Harrison, D. D. Studies in carbon tetrachloride poisoning.
3. The possible rôle of sulphur amino acids in detoxication, 85.

Fisher, S. Multiplication of *H. pertussis* in the mouse lung following intranasal infection, 609.

Fowler, jnr., R., and Upfill, J. The sodium thiosulphate space as an estimate of extracellular fluid volume in rabbits, 39.

Harrison, D. D., *see* Eden, E.

Hine, D. C., Dawbarn, M. C., and Smith, J. The effect of copper on the response to vitamin B_{12} and methionine of a mutant strain of *Escherichia coli*, 349.

Hine, D. C., *see also* Dawbarn, M. C.

Holman, M. E., and Shaw, F. H. The effect of yohimbine and other drugs on the isolated frog skin potential, 671.

Holman, M. E., *see also* Shaw, F. H.

Humphrey, G. F., and Kellerman, G. M. The metabolism of the seminal vesicle of the guinea-pig.
3. Nucleic acid content, 297.

Hunt, A. L. Investigations on glucose catalysis in bacterial metabolism.
2. Pyruvate and glucose metabolism in cell-free extracts of *Lactobacillus arabinosus 17-5*, 593.

Kaldor, I. Studies on intermediary iron metabolism.
7. The effect of splenectomy on the absorption and storage of iron in experimental anaemia, 637.
8. The fate in mice of injected saccharated oxide of iron, 645.

Kellerman, G. M. The metabolism of the seminal vesicle of the guinea-pig.
4. The rôle of hexokinase and phosphatase in the formation of fructose, 579.

Kellerman, G. M. Observations on the critical temperature for vasomotor reaction in the fingers of chilblain subjects, 215.

Kellerman, G. M., *see also* Humphrey, G. F.

Klauss, C., *see* Atkinson, N.

Kooptzoff, O., *see* Walsh R. J.

Ladd, R. J., and Thorburn, G. D. New test animal for acetylcholine assay, 207.

Lake, B. An analysis of some factors affecting experimental ascites in the rat, 391.

Lande, I. S. de la, *see* De la Lande, I. S.

Lawrence, J. J. The lysis of leptospires by antiserum, 91.

Lawson, P. T., *see* Cobbin, L. B.

Lee, P. E., and Mackerras, I. M. Salmonella infections of Australian native animals, 117.

Lee, P. E. Salmonella infections of urban rats in Brisbane, Queensland, 113.

Lemberg, R., Bloomfield, B., Caiger, P., and Lockwood, W. H. Porphyrins with formyl groups V[1]. Isolation of porphyrin *a* from heart muscle and determination of its haem *a* content, 435.

Lemberg, R., and Stewart, M. Porphyrins with formyl groups VI. Purification and properties of porphyrin *a*, 451.

Lemberg, R., and Parker, J. Porphyrins with formyl groups VII. Spectrophotometric analyses of mixtures of protoporphyrin, porphyrin *a* and cryptoporphyrin *a*, 483.

Lemberg, R., Stewart, M., and Bloomfield, B. Porphrins with formyl groups VIII. Preliminary studies of the porphyrin *a* isolated from mammalian tissues and micro-organisms, 491.

Linde, P. E., *see* Burnet, F. M.

Lockwood, W. H., *see* Lemberg, R.

McFadyen, R., *see* Cobbin, L. B.

Mackenzie, J. G., *see* Shaw, F. H.

Mackerras, I. M., *see* Lee, P. E.

McLean, D. M. Multiplication of viruses in mosquitoes following feeding and injection into the body cavity, 53.

McLean, S. J. The physiological characteristics of group L streptococci, 275.

Marsh, J., *see* Waring, H.

May, J. W., *see* Tomlin, S. G.

Messer, M., and Trautner, E. M. Inhibition by borate of ammonia formation and glutamine synthesis in brain tissue, 199.

Metcalf, D. The production of vaccinia haemagglutinin by the chorioallantoic membrane of embryonated eggs, 45.

Mykytowycz, R., Dane, D. Surrey, and Beech, M. Ornithosis in the petrel *Puffinus tenuirostris* (Temminck), 629.

Woolley, P., *see* Waring, H.

SUBJECT INDEX

Acetylcholine assay, new test animal for (Ladd and Thorburn), 207.

Adenosine and its derivatives, the effect of cardiac glycosides on the heart block produced in the guinea-pig by (Rand, Stafford and Thorp), 663.

Adenosine triphosphate and phosphocreatine, the use of pure enzymic systems for the incorporation of ^{32}P into (Rosenberg), 17.

Afroside B — a new cardiac glycoside, the pharmacology of (Rand and Stafford), 527.

Anaemia, post-haemorrhagic, in unanaesthetized rabbits, vasomotor responses in the femoral vascular bed to (Smith), 515.

Anaerobiosis with iron wool (Parker), 33.

Antibacterial substances produced by flowering plants.
2. The antibacterial action of essential oils from some Australian plants (Atkinson and Brice), 547.

Ascites, an analysis of some factors affecting experimental, in the rat (Lake), 391.

Aspartic acid deamination by intact *Proteus X-19* (Trudinger), 67.

Bacteria, electron microscopy of sectioned. A study of *Escherichia coli* (Tomlin and May), 249.

Bacterial metabolism, *see* Metabolism, bacterial.

Blood, the flow of, in narrow tubes.
2. The axial stream and its formation, as determined by changes in optical density (Taylor), 1.

Blood groups and other data. A study of twins (Walsh and Kooptzoff), 189.

Blood pressure responses related to types of animal preparation (Read), 405.

Borate, inhibition by, of ammonia formation and glutamine synthesis in brain tissue (Messer and Trautner), 199.

Brain, acetyl choline synthesis in, the action of morphine and antagonists of the narcotic action of morphine on (De la Lande and Bentley), 555.

Brain tissue, inhibition by borate of ammonia formation and glutamine synthesis in (Messer and Trautner), 199.

Carbon tetrachloride poisoning, studies in.
3. The possible rôle of sulphur amino acids in detoxication (Eden and Harrison), 85.

Cardiac glycoside, a new, — afroside B, the pharmacology of (Rand and Stafford), 527.

Central nervous stimulants, an apparatus for the study of the effects of, on the spontaneous activity of small laboratory animals (Cobbin, Lawson and McFadyen), 535.

Chilblain subjects, observations on the critical temperature for vasomotor reaction in the fingers of (Kellerman), 215.

Clover, subterranean, *see T. subterraneum*, L.

Coenzyme I, cardiac actions of.
1. Actions on the guinea-pig and rat heart *in situ* and on the isolated guinea-pig heart (Stafford and Rand), 651.
2. Factors affecting the response of the guinea-pig heart to coenzyme I (Stafford and Rand), 657.

Copper, the effect of, on the response to vitamin B_{12} and methionine of a mutant strain of *Escherichia coli* (Hine, Dawbarn and Smith), 349.

Cranial windows in the rat (Byrom and Cameron), 225.

Escherichia coli, the effect of copper on the response to vitamin B_{12} and methionine of a mutant strain of (Hine, Dawbarn and Smith), 349.

Escherichia coli, a study of. Electron microscopy of sectioned bacteria (Tomlin and May), 249.

Extracellular fluid volume in rabbits, the sodium thiosulphate space as an estimate of (Fowler, jnr., and Upfill), 39.

Fat, fatty acid and fat soluble dye, the intestinal absorption of, into thoracic duct lymph in unanaesthetized rats (Simmonds), 25.

Fat, intestinal absorption of, some observations on the increase in thoracic duct lymph flow during, in unanaesthetized rats (Simmonds), 305.

Fungi, antibacterial activity in members of the higher.
2. Psalliotin, the antibiotic of *Psalliota xanthoderma* (Atkinson), 237.
3. Antibacterial and antiphage tests with psalliotin (Atkinson), 381.

Genistein, the occurrence of, in subterranean clover (*T. subterraneum*, L.) and other trifolium species (Curnow and Rossiter), 243.

Glycosides, cardiac, the effect of, on the heart block produced in the guinea-pig by adenosine and its derivatives (Rand, Stafford and Thorp), 663.

Goitre, the functional activity of thyroid nodules in an area of endemic (Stuart), 429.

Haemagglutination, influenza virus, *see* Influenza virus haemagglutination.

Haemagglutinin, vaccinia, the production of, by the chorioallantoic membrane of embryonated eggs (Metcalf), 45.

Haemophilus pertussis, multiplication of, in the mouse lung following intranasal infection (Fisher), 609.

Influenza virus haemagglutination, assay of inhibitors of, by electrophoresis (Pye), 323.

Influenza virus haemagglutination, a mucoprotein from bovine submaxillary glands with restricted inhibitory action against (Curtain and Pye), 315.

Influenza virus, production of incomplete, in the deembryonated egg (Burnet, Lind and Stevens), 127.

Influenza virus strains WSE and CAM, recombination between the (Burnet and Lind), 281.

Injector, a continuous long-term (Rose and Nelson), 415.

Injector, a remote-controlled micro (Rose and Nelson), 411.

Injury, an experimental study of the reaction of skeletal muscle to (Constance), 257.

Iron metabolism, *see* Metabolism, iron.

Iron wool, anaerobiosis with (Parker), 33.

Leptospires, the lysis of, by antiserum (Lawrence), 91.

Lymph flow during intestinal absorption of fat in unanaesthetized rats, some observations on the increase in thoracic duct (Simmonds), 305.

Lysogenicity and lysis patterns in the Salmonellas.

3. A bacteriophage grouping scheme for S. *adelaide* (Atkinson), 371.
4. Application of a bacteriophage grouping scheme to 413 strains of S. *adelaide* (Atkinson and Klauss), 375.
5. Further tests with S. *bovis-morbificans* (Atkinson and Klauss), 421.

Metabolism, bacterial, investigations on glucose catalysis in.

2. Pyruvate and glucose metabolism in cell-free extracts of *Lactobacillus arabinosus 17-5* (Hunt), 593.

Metabolism, iron, studies on intermediary.

7. The effect of splenectomy on the absorption and storage of iron in experimental anaemia (Kaldor), 637.
8. The fate in mice of injected saccharated oxide of iron (Kaldor), 645.

Morphine and antagonists of the narcotic action of morphine, the action of, on acetyl choline synthesis in brain (De la Lande and Bentley), 555.

Morphine antagonism (Shaw and Bentley), 143.

Mosquitoes, multiplication of viruses in, following feeding and injection into the body cavity (McLean), 53.

Muscle, skeletal, an experimental study of the reaction of, to injury (Constance), 257.

Nerve and muscle cells, the nature of the sodium and potassium balance in (Shaw and Simon), 153.

Nerve and muscle, resting, the effect of yohimbine on sodium and potassium movements in (Simon), 178.

l-Noradrenaline infusions, the pressure-flow relationship in the femoral vascular bed of unanaesthetized rabbits during intravenous (Smith), 507.

Ornithosis in the petrel, *Puffinus tenuirostris* (Temminck), (Mykytowycz, Dane and Beech), 629.

^{32}P, the incorporation of, into adenosine triphosphate and phosphocreatine, the use of pure enzymic systems for (Rosenberg), 17.

Pancreatic lesion in adult mice infected with a strain of pleurodynia virus.

3. The response of the pancreas to the simultaneous production of amylase and virus (Dineen and Robertson), 567.

Pitocin injections in the fowl, observations on tachyphyllaxis produced by (Waring, Crosby, Woolley, G., Woolley, P. and Marsh), 103.

Pleurodynia virus, the pancreatic lesion in adult mice infected with a strain of, *see* Pancreatic lesion, etc.

Porphyrins with formyl groups V^1. Isolation of porphyrin *a* from heart muscle and determination of its haem *a* content (Lemberg, Bloomfield, Caiger and Lockwood), 435.

Porphyrins with formyl groups VI. Purification and properties of porphyrin *a* (Lemberg and Stewart), 451.

Porphyrins with formyl groups VII. Spectrophotometric analyses of mixtures of protoporphyrin, porphyrin *a* and cryptoporphyrin *a* (Lemberg and Parker), 483.

Porphyrins with formyl groups VIII. Preliminary studies of the porphyrin *a* isolated from mammalian tissues and micro-organisms (Lemberg, Stewart and Bloomfield), 491.

Psalliota xanthoderma, psalliotin, the antibiotic of (Atkinson), 237.

Salmonella infections of Australian native animals (Lee), 117.

Salmonella infections of urban rats in Brisbane, Queensland (Lee), 113.

Salmonellas, lysogenicity and lysis patterns in the, *see under* Lysogenicity.

Semen, the collection of rabbit (White), 367.

Seminal vesicle of the guinea-pig, the metabolism of the.

3. Nucleic acid content (Humphrey and Kellerman), 297.
4. The rôle of hexokinase and phosphatase in the formation of fructose (Kellerman), 579.

Sodium and potassium balance in nerve and muscle cells, the nature of the (Shaw and Simon), 153.

Sodium thiosulphate space as an estimate of extracellular fluid volume in rabbits (Fowler, jnr., and Upfill), 39.

Spermatozoa, mammalian, the toxicity of heavy metals to (White), 359.

Streptococci, group L, the physiological characteristics of (McLean), 275.

Subterranean clover, *see Trifolium subterraneum*, L.

Tachyphyllaxis produced by pitocin injections in the fowl, observations on (Waring, Crosby, Woolley, G., Woolley, P. and Marsh), 103.

Thyroid nodules, the functional activity of, in an area of endemic goitre (Stuart), 429.

Trifolium subterraneum, L. (subterranean clover) and other trifolium species, the occurrence of genistein in (Curnow and Rossiter), 243.

Twins, a study of. Blood groups and other data (Walsh and Kooptzoff), 189.

Vaccinia haemagglutinin, *see* Haemagglutinin, vaccinia.

Vasomotor reaction, observations on the critical temperature for, in the fingers of chilblain subjects (Kellerman), 215.

Viruses, multiplication of, in mosquitoes following feeding and injection into the body cavity (McLean), 53.

Vitamin B_{12}-activity, the determination of, in the organs and excreta of sheep.

3. The excretion of vitamin B_{12}-active factors in the faeces and urine of sheep (Dawbarn and Hine), 335.

Vitamin B_{12} and methionine, the effect of copper on the response to, of a mutant strain of *Escherichia coli* (Hine, Dawbarn and Smith), 349.

Yohimbine, the action of, on nerve and muscle of amphibia (Shaw, Holman and Mackenzie), 497.

Yohimbine, the effect of, on sodium and potassium movements in resting nerve and muscle (Simon), 178.

Yohimbine and other drugs, the effect of, on the isolated frog skin potential (Holman and Shaw), 671.

THE GRIFFIN PRESS
